

Scientific Program

The scientific presentations will comprise invited lectures, oral presentations, poster presentations, panel discussions and dedicated sessions for young scientists. The scientific sessions will focus on the following major **themes**:

- Cellular and Molecular Signaling : Animals and Plants
- Molecular Signaling in Chronic Diseases and drug development
- Trends in the molecular pathways research in human diseases process
- Stem Cell signaling
- Signaling in Plant Pathology
- Signaling in Microbial systems
- Signaling aspects of drug from the ocean
- Defects in cellular signaling
